

Practical problems in the methodology of research on responses to disasters A modern thought experiment on the study of the phenomenon of conflicts and people's indignation in the conditions of threats (peculiarities of the methodology of social sciences)

by Mirosław Zabierowski

Summary

We have been studying the epistemological consequences of the concept of the European Union army. We study the clash of the metaphysics of two different civilizations – Protestant and Latin. Research is being done in physics and economics. The concept of patriotism is analysed. Two identical sentences can mean something completely different. A sentence is never true in itself, unless it corresponds to specific metaphysics. Each fact has its own detailed metaphysics. It is too much of a cognitive burden for man and people avoid Einstein's silence^{i, ii}

Key words:

1. Indignation of President D. Trump and Minister A. Macierewicz over Germany's proposal to establish an European Union army

Chancellor Angela Merkel (13/11/2018) would like an "European army". *"We have to protect ourselves from China, Russia and even the United States. We will not defend Europeans until we decide to create a real European army"* – French President Emmanuel Macron.¹

US President Donald Trump showed the greatest indignation²: *"Emmanuel Macron suggested building his own army to defend Europe against the United States, China and Russia. But it was Germany that was the aggressor during the First and Second World Wars."*

Vladimir Putin praised the German project. He said hello to A. Merkel, after saying hello to D. Trump, cameras recorded D. Trump shaking (himself) his coat. This was considered an important signal in the world. Maybe.

Personally, I emphasize words and explanations. Words and sentences are in the centre of attention of opponents of Dr. Kornel Morawiecki. In connection with Mateusz Morawiecki's statements, a kind of schism continues. It concerns the milieu of Fighting Solidarity, patriotic circles, but also PO, Nowoczesna, PSL, SLD. What Kwasniewski and all those who come from the murderous Soviet option say that the primate advised the "king" (this title was used in violation of the law³) Prussia and the partition era.⁴ Here we will gradually make significant progress in the field of social communication.ⁱⁱⁱ

1 radiomaryja.pl/informacje/a-macierewicz-pomysl-utworzenia-europejskiej-armii-jest-sprzeczny-z-idea-ue-niepodleglych-narodow/; 19 XI 2018. Putin praised the project of creating a European army. No wonder, because such a formation would be an alternative to the presence of NATO and American troops in Europe. - The same for interia, wp etc. 17-18 XI 2018. All these media cannot write the First and Second World Wars. Instead, they write the First and Second World Wars. They treat the monstrous German crime, mega-genocide, as universals, as it is written behind mountains, rivers and forests. It violates the rules of the language and John Paul II never wrote that. Writing in lower case was recommended by an interview from beyond the small water.

2 *"The reaction of Donald Trump after the handshake of Vladimir Putin ... priceless"* – <https://www.tysol.pl/a25864--video-Reakcja-Donalda-Trumpa-po-uscisku-dloni-Wladimira-Putina-bezcenna>

3 Title is important in German Byzantine domination in the EU. The Queen of England reminded of this in the EU when she spoke the text prepared by British intelligence that she is the Queen of the Commonwealth and the army is Royal. Let them take her opinion into account. Germany and the F, but not GB, form a block. Margaret Thatcher, out of concern for Europe, wished Germany a division. GB and USA – a different block.

4 M. Morawiecki's physicist is criticized not only by oppositionists, but also by SW. But what is needed here is an astrophysical mind, frequent in methodology, in Thomism. An important phenomenal object in political science was created, which is not understood by the mind of the schools of the Third Polish Republic, which is localist, shredding and, in fact, autistic. I will pre-model it to achieve a new astronomical quality - horizon beyond the horizon.

2. The army of the Polish vassal in Prussia like the army of A. Merkel

Another friend of ours, a Prussian vassal, had such a European army, who sent European troops at the request of various kings and dukes, until they were impressed and began to call him king. We have to create European troops - said the Prussian vassal. Branches sent to various parts of Europe. The same is repeated by the allied vassal, Angela Merkel, from the conquered country – for their monstrous barbarism in the w.w. II⁵ (Poland was an ally).⁶

3. Stabilization or destabilization. How is this possible?

Vasal Frederick II: we will stabilize Europe with our European army; read we will destabilize – Hegel put it well in his system. Merkel also pointed out that the EU army will stabilize the situation: *"a common European army could show the world that there will be no war among European countries"*, because this army will eliminate the resistance of nations to the consequences of Merkel's policy, especially after 2015 or on December 16, 2016, that is, then there will be no more war. You can see how the murderous mind of the automan is subject to this spirit of German crime.

She added that such an army would not be against NATO – the same was said by the vassal prince of Prussia that his *"army does not want to question classic alliances."* will soothe the defiant.

4. Social criminal mind as an excellent businessman

The criminal mind is always ready to blur itself that it is against independent nations. The minimum application is a federal EU, but it is about something else: in Adenauer's, German sense, Germany did not lose the war in 1918, because their armies did not land within the borders of Germany, so they want to control those areas. Today, the diplomacy of free nations should strive to expose the truth that Germany should pay for this thinking, submit to voluntary criminalization, punish the fact that Germany incites not Russians, but Putin's anti-Russian administration, Putinists; The Germans lead the countries of Central Europe to trade at the stall entitled Russia's military might.

From 1989, for 20 years, Russia did nothing in technology, because, technologically ahead of the West, it could afford it and handed over to the West free trains full of photocopies of technological documentation.⁷ The technological advantage was so great that Russia was able to complete technological research for 20 years. If this roaring cow, demanding the GRU milking plan, only kicked its left and only its back hoof, the West would literally fall apart, even 20 years later, i.e. after the cessation of technological works. Therefore, the GRU plan was strong in the anthropic niche⁸ of saving the West.

5. Merkel, like the Potocki family, offered the Hohenzollerns the partition of Poland

What Merkel did in 2015, German psychiatrists explain the mental disorders of this physicist, an atomic physicist. Autism is a disease similar to alcoholism. And this insolent car, as usual, today tries to open Europe to the wind, knowing full well that:

- 1) NATO's goal is to control Germany, Germany rules Economic Europe and aims to create an independent army, the US bases in Germany are interpreted as a continuation of the defeat as a result of the US joining the 1st and W.W. II,
- 2) it is in the interest of strong countries, not small and ...NATO,

5 Due to the monstrous barbarism of German, the German intelligence service does everything not to call it the phenomenon of banditry and not to write the 2nd century St., only the 2nd century St. Never did John Paul II write otherwise than World War II.

6 M. Zabierowski [in Polish], *Dzieje sojuszu sowiecko-niemieckiego 1939-1941. Europa jako pangermania czy eurosowiety?*, Fundamenty 3 (2005), pp. 15-18.

7 And this is an invisible component beyond the horizon.

8 I explain the concept of an anthropic niche in *"The status of an observer in modern physics"*, *"The universe and man"*, *"The universe and knowledge"*, *"The universe and Copernicanism"*, *"The universe and metaphysics"*. I can't start over here – I'll come back to that at the end of this study.

3) No European army is able to compete with the Soviet army, slightly modified compared to 1989 by the results of several years of work on new technologies.

4) The Allied High Commission recognized Prussia as the greatest threat to Europe,

5) from Potsdam, the German Federal Republic (Bundeswehr) has no general staff and is under the control of NATO so that it does not plan a third world war, because a monstrous barbaric World War II is enough, while in the European army they will have a general staff that will plan invasions on European nations,

6) the very effort of the German Federal Republic to change the spelling of World War II – into the 2nd W.W., is, from a humanistic point of view, unacceptable; the second army sounds like a second – next to the euro – currency, like a second language in the sense of communication, like the second truth about World War II.

The mind of the murderer always offers to sell the weaker, as the Potocki family offered Poland to the Hohenzollerns.

6. Continuation of the experiment – 7 other premises

The mind of the murderer is also looking for an aggressor (these are not the Russians, but the German Kremlin administration) and it says like the Potocki family: we are scoundrels like you prince, but we will help you dominate Poland, you will dominate Central Europe, and maybe then France.⁹

Russia is not the king of Europe so far, it is only a vassal. She needs an army of German strength. The *Micron* German Shepherd Dog added in the European Parliament that Europe must defend itself against Russia, China and the US.¹⁰

This is in line with the anti-American concept that it is not Poland but Prussia that should have access to the sea. The leakage of this "*brain*" in 1989 was the many years of hanseatic hysteria in Pomerania.

German, Catherine II, Catherine the Small¹¹, she dreamed of an army against Poland, to separate Poland (the free world, today and the USA) from Europe. Denouncing Macierewicz that he did not buy helicopters, frigates, tanks is a manifestation of a confusion of language, as was done after 1989, with words such as trade, trader, institute, analysis, and above all patriotism; this can be seen in the frivolous Western capital changes in the content of left-right concepts^{iv}; this renunciation makes no economic sense. Morawiecki's concept¹², that – to put it bluntly, according to the media – PiS is poisoning and slandering Russia, and as a result we are losing agricultural and fruit exports and industrial production is also unsustainable, after all, after 1989 our car dealers wanted to sell the Lada 110, Niwa and others on a large scale, they turned to SLD for help, but Kwaśniewski, Cimoszewicz, Miller, SLD, SdRP, etc.

7) Although the USA sold Poland in Yalta, the capitalist system is defective here¹³, as the one who created the heir of the brown dragon in Potsdam.^v

8) Only people with mental disabilities (in medical terminology, complete idiots, although they are very valuable individuals in society, but not the struggle for capitalist existence), who do not understand Koneczny's theory, do not realize that the German Federal Republic issued the struggle of civilization Latin, summoning millions of adversarial civilization that has already created an efficient urban guerrilla in Europe, including sophisticated murders, so also a staff in this Merkel's army should be created. As you know, the common EU guard guarded the borders "differently".

9) The East is another valuable civilization, but hostile to Latin, with its Leibnizian form of *liberum veto*. This is not Europe, however. Russia describes itself as a raw material, Mongolian Asia. And let the EU Commissioner Danuta Hübner stand at the head of such an army.

9 Prussia wanted to partition France. France saved itself by proposing to the king in Prussia (legal category, Polish, indicating the legal status of a vassal; not to the king of Prussia) a second partition of Poland.

10 Interia, wp, etc. 14-16 XI 2018.

11 Catherine the Small, called the Great in Russia and in the West, was the cause of the multi-millionth genocide of the Russians.

12 by electronic media.

13 I constantly refer to the storms around Morawiecki, a physicist. And I see it as a question of physics.

10) The European army will be too weak for Russia's potential, but its intervention in Poland, on the scale of Poland's losses after 1989 (even \$ 100 billion a year), will enable Russia to intervene, just as the intervention of Prussia allowed Russia to intervene in the 18th century. and the primate helped the Prussian army (EU) by sending Fryderyk a plan to defeat the insurgent troops (Territorial Defense Forces). Let the EU army intervene (1066) instead of those who lay down on December 16, 2016 to carry out a coup *d'état* – such an intervention will be much more effective than KOD, which, after all, showed German plans, just like Nelly Rokita. Did the KOD not intervene in the defense of Law and Justice, Democracy and the Constitution and Judges, the defense dictated by the WSW? Has he not intervened for someone else's money? This will reduce the potential of the Polish Armed Forces in relation to Russian troops, if the EU takes a common position regarding the punishment of the Polish nation, i.e. a culture other than Byzantine and Native Americans.

i Einstein argued that one must be surprised and surprised where science arises. It is better to translate this term by Einstein in the words of Marysia Zabierowska from Ia Primary School 93 in Wrocław, which found their way into neurological and anthropological literature (J. Trąbka, A. Wierciński, doctor W. Moskalski; works and conference in Staszów 1999): be silent.

ii At this point, I must say that I also include Kornel Morawiecki in the team that supported this study. Why? Well, analyzes of truth, facts, not only physical ones, socio-psycho-social communication and other similar problems were accepted and discussed with Dr. Morawiecki at my seminars after 1989, in my books that Dr. Morawiecki knew and read. Morawiecki cope with my work How much good does the best modern ideology of a good economy have? Free market gambling, *Fundamenty 4* (2006/2007), pp. 2-16, while it turned out to be too difficult for the employees of the Department. Management, also for professors from UMCS, but not for the most outstanding anthropologist of culture, Andrzej Wierciński, not for Mazurian J. Kossecki, co-author of the coup d'etat in November 1991. Yet another. If we say that our medicine is dehumanized, then we think we understand each other well, we think so because we think about oncology, chemical infusions, irradiation, results indicating autism, cancer and other diseases after vaccination, about falsification by financial centers these data, about the great struggle against truth by capital, capitalism. If we say that there is a humanization of physics, we no longer know what it is, we no longer have any key to it; and that one of the goals of the humanities is to refine the exact sciences, people are surprised to open their eyes and completely do not understand it, because they think that the humanities is such a talk, and that physics is anti-humanities, it is an exact science, separated from the humanities. The Department of Physics Methodology is a department of the humanities in the sense of the humanities of physics. One must be able to appreciate the fact that K. Morawiecki understands this effort, that is what creates the team. How much is understanding!

I will take this opportunity to present something else that he understands. It is argued that there is no free life, no production, no journalism – and rightly so, because human labour must be paid for in order for life to last. The number of Polish families has doubled. Thousands of magazines were paid for by socialism, the People's Republic of Poland. There is always someone who pays for journalism and the state paid for it. Hated in lectures by S.M. and other authors from the UPR, "The Highest Time" state. The hated state in the statements of Tischner, Życiński, Heller, Zięba, Obirek etc. It was after 1989 that the hated "everyone", socialism, communism, the hated after 1989 "common property", national, socialist, that is, employees took on their shoulders the financial responsibility for the existence of independent, grassroots journalistic initiatives, such as "Trwam" in Częstochowa to which I wrote under the pseudonym A. Zieliński. If the employee does not pay for journalism, that is, the hated "everyone", socialism, or whatever he calls it, let there be a commune, then the so-called market, only low-quality modern media, such as high-volume GW, TP, etc., remain. improve everything, and even if you need to employ thousands of people, not a hundred, so that they can see when the director took the children to the doctor in his company car last week – from the University of Technology, Pafawag, Eldom or Elwro, and thus improve work. Today there was no one to control Amber Gold.

Nobody calculated the GDP on the basis of the monthly costs of the operation of an underground newspaper, for example, "Towarzystwo Kursów Społecznych", "Trwam", "Andrzej Zieliński" – I still hung this newsletter in 10 copies, typed on the machine, at the Polytechnic, and the SB liquidated it. How much is such a posted newspaper at the Technical University worth?

It is the equivalent of the board dedicated to Archbishop. Andrej Szeptycki, suspended by President Dutkiewicz in the rector's office of the B. Bierut University in Wrocław. Abp, and now President Dutkiewicz, honored support for Hitler, Waffen-SS Galiziein, "when the Germans from

- 11) The EU army could cause various depressurization, e.g. be used as ZOMO, ORMO.
- 12) Impose communication styles, e.g. a spelling concealing monstrous German crimes, just as the spelling of World War II was changed to "world war II", which suggests that World War II is normal and may be next.
- 13) Impose the elimination of the Republic of Poland in the area of production of high technologies and technological innovations, but also in the field of social sciences, management and psychology (also on the basis of fear of touching certain topics).
- 14) Such troops apparently belong to the Freudian dream of Merkel regarding A-class conscripts, who, by the way, fill penal institutions, and according to Merkel, they could be doctors under single-element administration.

the SS, supported by the Ukrainian police, carried out mass murders of Jews," F. Isakowicz-Zaleski. Archbishop Szeptycki created SS and UPA chaplains, during the mass the crosses were surrounded with SS signs, the axes were blessed; "They even directed these murders," the clergy explained that their neighbor was certainly not a Jew or Lach. The archbishop sent a tribute letter to Hitler, to Stalin, thanking him for the invasion. Zaleski: "It is shocking that his attitude during the war does not prevent the present authorities of the rite from trying - attention! - for the beatification of the metropolitan. By the way, Primate Stefan Wyszyński opposed it twice." How much financial effort should be made to bring education to the appropriate level. I am talking about this in order to assess the actual GDP. According to the Nobel laureate Abdus Salam, it could have been not 10th place, but 9th.

Today, the online newspaper "Kresy" estimates the costs at PLN 20,000. How much would such work without the Internet, paper work, with printing ink, polished metal plates, with photocopiers a hundred times more expensive – would be worth – since 1981 technical progress has reduced costs a hundred times? And that would be 20,000 today. zloty. You had to have paper, printers, people, a car, bear the costs of the risk of meeting the SB, observing, then you moved to the field of observers (not only where the prime minister printed :-)) to create an alibi so that they would not suspect that it was being printed (in WL, etc.); conversations were made to reverse the tasks of observers, time was devoted and someone was paying! And who? – Allowances, free holidays, GDP, and even let it be "Are you standing or lying down". You had to go with the editorial office of "Conscience" to Środa Śląska under conspiratorial conditions, through snowdrifts. Bring the metal sheets to Gwiazdzista with Leopold Trojanowski (murdered in 1990), design, organize security, then - under the fire of the curious - pack the newspapers, take them to Nowa Sól, Milicz, Krakow, to T. Mazowiecki (well), to John Paul II, to the CIA, to distribute SW stamps, not for money, but someone financed it, some income. What income? - It was all financed by the socialist system. Uncounted national wealth was this source of income. Today, design and security agencies would value such a service at one hundred thousand zlotys and this financing suddenly disappeared after 1989, because the state disappeared, because the sources of financing life were eliminated, today GDP is only 10% of what it should have been if it had not been for the destruction of the existing ones. r. 1989 production capacity of the country.

The Solidarity Information Bulletin was created in someone's apartment, someone paid, emergency rooms were prepared. The level of today's media in comparison to the level of BIS, Trwam, Consienia is none – it was such a professional level that it concerned the whole life. In order to raise it, education would have to be financed. Someone financed it then. Commune. Spoken portals were created at that time, for example Czesław Dylowicz from Kraków (from Karmelicka Street?), "Spoken Chronicle". Free? No, it was from uncounted GDP.

Qualified intellectuals created such "Chronicles of Krakow" Spoken, but their lives were paid for. Outstanding specialists in a thousand industries, human resources, financial, local, international and God knows what, who tried to find truth-relevant information every day, which is rare today. Meanwhile, capitalism is so ineffective that it had to hit the population so much after 1989 that it was impossible to finance this activity, e.g. where to get reliable knowledge about the technical parameters of ships, acids, cranes, lathes, about the possibilities of our factory, if factories

7. Final phase of the experiment – 6 other premises

The European army under the command of friendly outspoken Germans was seen in Warsaw in 1944.

16) How do we know that Merkel does not want to return to the idea of World War II, when Ukrainians, Swedes, Belarusians, Albanians, Lithuanians served under the German command, there was an Old Testament unit. Also Norwegians, Belgians, Latvians, Estonians, French¹⁴, Swiss, Spaniards, Czechs, Slovaks, Italians, Poles, Serbs, Dutch, Croats, Danes, Bulgarians, Bosnians, Romanians and others. Will there be Russians in the new second army, just like the Swiss in the Senghen pacts?

17) Does Europe not know a common brotherly army under the Soviet command – in Poland from September 17, 1939.

18) There are empirical grounds that such an army would be able to "convince" any nation in the ABC area, as "the frankers" were convinced. How after 1989 Poles were persuaded to call development what President Kaczyński described as degeneration and briefly justifying "A society based on the market must degenerate!"; people wanted to build prosperity, professed the "progressive" idea of the right-wing in 1989 the only high-circulation newspaper, but it turned out that they had been deceived and built the dismantling of the economy.

19) The post-1989 process is a model that can be transferred to the EU military. Wasn't there a joint war with Poland and an economic war after 1989? After 1989, were common goals not realized in

14 Are the characteristics of the French nation suitable for defense against attacks? – The Germans are brutal, murderous, said Bonaparte, and the French are quarrelsome and quarrelsome. Only the Poles did not betray. We do not have theory of mind to introduce German management of a second army alongside NATO (currency in fact, alongside the euro).

were disappearing one after another. If you value our work, if you use it, then pay for our work. Capitalism has ceased to value work under the guise of valuing it. Workers said to capitalism: please join the group of people who contribute to the financial foundations of our website, and capitalism replied that it must deal with the destruction of the economic foundations of such work.

WSOWL, Wrocław 2012, pp. 1-152; *O relacji korespondencji i warunku kumulacji wiedzy*, Prace III Kongresu Kultury Polskiej na Obczyźnie 1 (2000), pp. 135-139; M. Zabierowski, N. Smyrak, *O humanistycie nauk ścisłych jako zjawisku kulturowym*, Cosmos-Logos, vol. VI (2002), pp. 135-140, Oficyna Wydawnicza Politechniki Wrocławskiej, Wrocław 2002; M. Zabierowski, *Dotknięcie, naznaczenie, fakt*, Sprawiedliwi 11 (2005), pp. 14-16; *Biuletyn Stowarzyszenia Kultury Chrześcijańskiej*, Wrocław 2005; *Przeciw kulturze*, Akant 9 (2008), pp. 10-11; *Miesięcznik literacki*; ISSN-1429-9054

iv When the Mikron-Merkel concept of the EU army was created, France was allegedly taken over by extremists, radicals, nationalists, trade unionists and socialists; this is how this half a million working people are criticized – right wing, conservatives, left wing, Mikronowcy, Catholic newspapers. There are homophobists on the barricades – according to the government and the "left". They are religophobicists, leftists and Marxists, and therefore the commune, the Catholic newspapers announce. No, they are rightists, anarchists, racists, anti-cabalists, etc. – leftist, legal and Catholic writings. – People appeared on thousands of barricades (blockades). Some barely living from first to first listened to religio, islamo, femino-phobic remarks.

Mikron Merkel's army could arrest the uncoordinated and disorganized – these movements. In the name of maintaining democracy and public order. But, the police and the smarts did not know what to do because there was no language left. Due to the Internet, the SFSR – the French Soviet Union of politicians and trade unions – is collapsing. Only Mikron Merkel's army can cope with this new social reality. This is what autism is all about.

v Morawiecki distinguishes capitalism from technological progress. All politicians in the 3rd Republic of Poland, with the exception of him, identified it, that is, they made an error of analysis. This proves more capable than thousands of politicians. In the Department of Methodology, I have heard him talk about the need to increase rail transport more than once – an electric train in a long underground tube, in a "vacuum", on a magnetic cushion, at the speed of Tu 144. The increase in cars and the length of highways proves the superiority of individualism and capitalism. The artificial dismantling of socialist rail connections is omitted.

relation to Poland and the period of the Polish People's Republic, lasting 44 years, not changed into a period of doubling the population of 1,439 +/- 200 years, on the basis of data available in 1995 (calculations by prof. J. Szarliński; similar to the calculations of other, e.g. prof. Wierciński). Was not the USA the guarantor of the defeat of Germany?

There is a problem of great poetry unknown to Germany – the Christ of Nations. Isn't the strongest state of the community, and not how it should be, the main administrator of the hostile actions of the economic war, and not as it should be – the state most wronged, the most experienced, on the same principle as the oldest people, not young people, are the best family leaders, all communities, nations.¹⁵ Will the leadership and leadership fall to the nations and people of John Paul II, the most developed and knowledgeable nations? Will the priorities of Christ, Thomistic, Wojtyłowski, the Solidarity system 1980-89, Aristotelian, Platonic and Kościuszko be the most important for these EU troops? Really? Or maybe Wafen-SS? And what are the premises for this, what are the entymmas? How do we know that this brotherly army will not "defend" us against Copernicanism¹⁶, development in the spirit of Solidarity and the Polish culture of *lex continui*, ahead of humanity?^{vi}

Would Poland not lose the defense capacity of the country, or Gdańsk and Warsaw, by entering into the system of the "common European army"? Some empirical tests were brought by World War I, also World War II – there are empirical facts that help came from the West against the partitions, but still from America; or deals with France?

8. The culmination of our experiment in studying the phenomenon of outrage¹⁷ in Poland and in the world under the conditions of threats

8.1. Merkel and Macron versus Kaczyński

All this explains – in a very simple way – problems with understanding the statements of Morawiecki, a quantum physicist. A man who wrote a doctorate like Morawiecki and who experienced years of unusual consideration of what methodology brings¹⁸, it already thinks that it is no longer well read. He realizes that there is still a horizon beyond the horizon.^{vii}

15 The statements of K. Morawiecki should be read through the prism of questions outlined here. It is like with 500+, Dr. Morawiecki appreciates, but is aware of the consequences.

16 It is the issue of pedagogy "differently", taking over the Encyclopedia and the PWN sign, concealing the essence of education, Polish culture, changing the sense of the Polish concept of humanities (methodology), solidarity, in the context of Solidarity and Copernicus, Catholic, Christian and Polish civilization, transformation, EU, the situation exploitation of Poland and the Jadwińska concept. The aim of the EU is, for example, the relocation of migrants, opposition from Slovakia was not possible.

17 It is an interdisciplinary issue of assessing and analyzing Morawiecki's statements, and people's dissatisfaction with them. Also a reduction (by 90%) of the power of financing life, a linguistic, conceptual, demographic catastrophe, invisible hand of the market, chaos, maturation of L. Kaczyński, methodology of science, refining exact sciences, theory of development, beauty and systems.

18 Everyone can try from "Love and Responsibility", "Person and Action", the works of St. Tomasz, Kant, Fr. M. Krąpiec, "The History of Philosophy" by Tatariewicz and then he will notice a higher level. At first it is imperceptible and there have been tensions more than once, because this is what studying is about.

vi The German owner of the PWN '96 Encyclopedia (as if the reissue of the PWN '76 Encyclopedia) falsifies the entry Copernicus and manipulates the content of this entry in such a way as to hide the originality of Polish thought, Polish civilization. M. Zabierowski, Is 'The Great' Transformation is Copernican?, [in:] *Pedagogical and Educational Challenges of Contemporary Transformations*, (ed.) R. Czyżewski, B. Drozdowicz, Wyd. The Chair of Philosophy of the Pomeranian Pedagogical University, Słupsk 2004, pp. 186-194; M. Zabierowski, Fight against Copernicus and Copernicanism, *Maurycjusz* 10 (2001), pp. 13-15; M. Zabierowski, *Fight against Copernicus and Copernicanism. part 2*, *Maurycjusz* 12 (2001), pp. 9-10; parts 3 and 4 did not come out due to lack of money; Universalism and Copernicanism versus concretistic realism in physics, *Quaestiones*, vol. I (2002), pp. 181-188, Oficyna Wydawnicza Politechniki Wrocławskiej, Wrocław 2002; What is Copernicanism? [in:] *Space in contemporary science*, edited by S. Symotiuk, G. Nowak, UMCS Publishing House, Lublin 1998, pp. 71-76; *Jadwiżanizm and Copernicanism*, *Annals of Science* IV (2003), pp. 91-100, Wałbrzych; *Development issues in the free market. Cosmology and 'economic entities'*, *Foundations* 1 (2004), pp. 31-34. The aim of the EU is, for example, the relocation of migrants, opposition from Slovakia was not possible.

vii M. Zabierowski, *O przedmiocie filozofii innowacyjności techniki*, *Fundamenty* 5 (2008/2009), pp. 42-43

Where does the indignation come from? And why no one understands anything from the statement of K. Morawiecki, who was not for any extremism (against Urban, Jaruzelski), and the radical nature of the SW consisted in a negative assessment of WRON, SB, communism from the Soviet Union. There was no other radical. This is an invention of WSW, GRU – SW wanted a roundtable in 1981, and even in 1980 (Gierek wanted it, Kania blocked it). This is a serious historical thesis, while WSW (GRU) played the role of a hysterical woman – meanwhile, *“The nation united and we had a chance for a new reality. We were deprived of our hope by martial law. It was a terrible harm done to the Polish nation”* (2017). In my opinion, Morawiecki's alleged anti-Polish pro-Soviet statements are completely misunderstood. Although according to CBOS (2016), 41% of Poles consider the decisions of the communist authorities to be justified, Morawiecki is right that "such a result is the result of the 1980s and 1990s", namely the result of the attack on Polish history by the soviets and capitalism. – *“How was the introduction of martial law supposed to be right? – Social thinking has been shaped so that the results look like this.”* - In the social sense, capitalism is a betrayal of the ideals of Solidarity, John Paul II.

Well, in my opinion, Morawiecki wants to show, and rightly so, that the truth appears through correspondence: the truth appears only if the sentence uttered corresponds with the theory, if the theory gives it meaning. It is like that in physics.¹⁹ This is his intuitive theory of relativity, that is, acting for the benefit of the nation's life. Here is the proof: Who is proposing the creation by the European Union of an army to be used to defend Europe and to send to inflammatory regions? Who? – We know – it's Merkel.

Lech Kaczyński believed that the EU needed its own army, would he therefore be an opponent of Trump, Macierewicz? Maybe I'll start with the fact that Macierewicz is being rebuked because he wanted an agreement with Jaruzelski. K. Morawiecki, 13.12.2016: *“I talked to Deputy Prime Minister Aleksander Kopć. He said that he was offering Jaruzelski a round table in 1981.”* It would be a great dispute over history. L. Miller, Kwaśniewski, Rosati, Olechowski, Balcerowicz, Czarzasty, Petru, PO, Nowoczesna and PSL praise Jaruzelski. A different opinion than SW is the so-called the opposition allegedly from Solidarity. – Contrary to SW, Morawiecki, the right wing from 1989 claims that the round table was not an anti-Polish conspiracy. UD, UW, AW \$ LD, PO, KLD, SKL, ZChN, AWSP etc. Kornel Morawiecki to Władysław Frasyniuk (13.12.2016) – *“come to your senses!”*, Especially in comparing the PiS government to WRON. Frasyniuk called for support for the KOD, overthrow of the government. It was supposed to take place on December 16, 2016. That's what Tusk came for.

1980? – These would be genuine conversations. Prime Minister Babiuch spoke to me in a similar way, as did Paweł Bożyk (by phone). This is so much in the context of the allegations, and there are a million of them in the electronic media, that the Russian agent is Minister Macierewicz. He assessed the events of December 16, 2016 as a coup d'état. *“The most important thing is the good of the country that has been violated. It has to be fixed, preferably by a concession, but it doesn't look like it.”*, *“PO and Nowoczesna are parties representing a part of Polish society which was deprived of influence by the 2015 elections. The opposition is interested in the end of the process of fair equalization.”*, *“I would ask my opposition colleagues, Mr. Schetyna, to step down and stop blocking the rostrum.”*, *“What they are doing is outrageous to me. They say they are defending democracy by destroying democracy. It's an inversion of concepts”*.

I look at it all differently from the critics of K. Morawiecki. Let us consider the whole thing further.

Lech Kaczyński proposes *“the creation by the European Union of an army that could be used to defend Europe, and also sent to inflammatory regions”* – in an interview for the Financial Times.²⁰ The same words were spoken by President Kaczyński and a German. In a segmentation civilization, this is beyond comprehension.

19 M. Zabierowski, *The principles of conventionalistic philosophy of physics and astronomy*, *Astrofizika* 36 (4) (1993), pp. 45-57

20 [1utm_source=paste&utm_medium=paste&utm_campaign=chrome](#)

In connection with the reduction of the power of financing life by 90% in the Third Polish Republic, people feel attacked by some invisible hand... – Economist: market. President Kaczyński: the market square. In the conditions of a demographic or economic catastrophe, Poles feel threatened and attack words, terms and each other, like closed caged tigers. Believing in capitalism, they have become slaves of the cutters, they are trapped, hence the attacks of people on the physicist Morawiecki. Morawiecki knows about it, therefore he appealed to pay 500+ to all students after graduation for the next 50 years. After 10 years of studying management and economics, everyone will notice the shortcomings in studying physics, and after 15 years, they will understand the need to study the works of the Department of Methodology of Sciences and the Humanities Laboratory that I founded, specialized in refining exact sciences, especially physics, cosmogony, astrophysics, cosmology and general theory development, beauty and systems.

8.2. On the issues of the philosophy of explaining the content of the criticism of capitalism by K. Morawiecki and the philosophy of capitalism

We have a starting point: Lech Kaczyński believed that the EU needed its own army. Would he be a Merkel-Macron supporter? Opponent of D. Trump, A. Macierewicz? This is what it looks like at first glance. We look differently at the same message that L. Kaczyński proposes *"the creation by the European Union of an army that could be used to defend Europe, as well as send to inflammatory regions."* The same words were spoken by President Kaczyński and Merkel in the Greater Poland (Wielkopolska). Certainly in a segmentation civilization it is impossible to comprehend it, but we are making this effort. It is exactly the same with the difficult to understand statements of an experienced scientist – K. Morawiecki; I repeat – Morawiecki's doctorate in physics was extremely demanding in terms of the discipline of thinking and the ability to deduce such an intensity, one in a hundred, probably and less often. This, too, must be said, since there is such dissatisfaction.

This makes a profound sense in the field of epistemology. Quotations, memes, aphorisms, all short forms are harmful, if they are not preceded by a long, say, 50-year study. That is why Morawiecki wants to pay for studying. It's very human. – We are going by car, you can see the pheasant looking around, he is alert because of the surroundings. Didn't he get it from the heuristics of the works of the Department of the Methodology of Sciences?

People make the mistake of quoting the other. In other words, the same sentence but means the opposite, i.e. the fact itself does not mean anything yet. There is no point in quoting John Paul II if he has not read *Osservatore Romano* from the 1980s or several thousand pages first. It is about type, sort class. Lawyers make the mistake of realizing types. L. Kaczyński meant something completely different. Kaczyński understood differently: 1) the creation of 2) the European Union, 3) the army, 4) you can, 5) use it, 6) defense, 7) Europe, 8) also, 9) send, 10) inflammatory regions. In this thought experiment, we have a clash of two metaphysics of two different civilizations - 1) Western Protestant, violent, rapid, segmenting (out of chaos order), concretist, right-wing (also called left-wing), Darwinian, strike and 2) Latin Catholic *Lex continui*, or, if you prefer, *liberum veto*.²¹ To get to know them, you must at least read the series *"Universe and Man"*, *"Universe and Knowledge"*, *"Universe and Copernicanism"*, *"Universe and Metaphysics"*. There are no shortcuts. Before quotes, sentences, statements, particulars, facts, definitions are theories. Great difficult metaphysics.²² People on the internet praise capitalism and do not understand what "order out of chaos" means.²³ This is the principle of behaviour in physics, but this design has not yet been proven. The transfer of this principle to economy is evidence of the intellectual collapse of the supporters of capitalism – and this is the content of K. Morawiecki's criticism of capitalism.

21 It is impossible to describe and beyond our imagination what we saw during the session of the Polish Parliament in the meadows near Warsaw – the envoys of the King of England wrote.

Zabierowski, *Ile dobra ma najlepsza współczesna ideologia dobrej gospodarki? Kosmiczna eschatologia wolnego rynku*, Res Humanae 8P(2000), pp. 137-181.

8.3. Astrophysics of social sciences

I can say otherwise that at my seminars I have created an exorbitant hope – there is still a horizon beyond the horizon. This is the astrophysics of social science. K. Morawiecki is also guided by this, but it is too difficult for the average recipient, politician, economist, and even a patriot. In my opinion, all those who took degeneracy for development in the Third Republic (President Kaczyński: *"A society based on the market must degenerate"*) were not patriots.

Patriotism requires patient work on oneself, focus, giving up copying, repeating, segmenting, and being concretized. There are also no patriots in the West, but there are: 1) intelligence, counterintelligence and various services (not only, for example, bribing officials and deputies in the Sejm) that watch over, and 2) road roller, i.e. money, economy, financial domination. Both of these factors prove that there is no patriotism. Both of these factors are absent in Poland and people take this burden on themselves, which increases quarrels and insults.

Let it be, but there must be a methodology of sciences, as in this study: not a single sentence is true, unless it corresponds to the great detailed metaphysics of that sentence. And every fact has its own detailed metaphysics. It is a heavy burden for a person, because it is easier to live autistic - carefree and rest, play and distract, play social games, than create and live responsibly.

Another example of economic wisdom: *"The prices of a barrel of crude oil in New York and London rose at the beginning of October to their highest level in four years, and investors feared that due to US sanctions against Iran, oil prices would not fall significantly in the world market. Saudi Arabia, however, like Russia, has increased its oil production very much to prevent a market shortage."* ^{viii}

It is precisely the increase in prices that prevents the shortage on the market. And so the workers turned against Gierek, because the government acted according to the market rules and raised the prices of meat and cold cuts a lot, precisely in order to prevent shortages on the market.
